Doosan Infracore America is the fastest growing forklift business in the North American marketplace, due to their stability in retaining a high level of consumer service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division located in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

At first the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a domestic machinery expansion project. Sales of these products were primarily targeted to state-run companies, large scale organizations, and the military. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education grew to become the new focus for enhancing quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a position of substantial expansion of their lift truck operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added goods for export. In 1993, the company had a global sales system and started exporting versions they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international markets.
