

Electrical Part for Forklifts

Forklift Electrical Part - Lift trucks along with other forklifts could have specific labels used in some hazardous locations. The label denotes that this particular model of forklift meets the minimum standards of ANSI/UL 553 for electric lift trucks or ANSI/UL 558 for internal combustion engine lift trucks.

Applications for marked trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Areas of Use, Maintenance and Operation, and Type Designations. Ask your local insurance provider and Fire Marshall for more information concerning the approved uses of industrial powered lift trucks in your application.

If the certain lift truck meets the outlined standards, labels could be attached. A labeled lift truck would show the type of designation located on the nameplate and would have a properly corresponding label put.
