

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Newly retired, after spending numerous years working with his brother to build their crane company into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

Whilst on their journey, John spent time talking to former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered an infinite market for a product that could quickly and securely lift people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they created and sold the first JLG aerial work platform. The company incorporates many of the basic design elements of that original lift into existing designs.

JLG lift trucks have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer environment.
